

Listed below are the instructor-to-student ratios established for each NAEMT course. Course coordinators are expected to utilize these ratios when conducting NAEMT courses. The course administration feature in the NAEMT Education Portal requires the appropriate instructor to student ratios when courses are registered. Training centers requesting a one-time exception to these ratios should contact [education@naemt.org](mailto:education@naemt.org).

- All Hazards Disaster Response (AHDR) - 1:10
- Advanced Medical Life Support (AMLS) - 1:6
- Community Paramedicine Series 1:10
- Emergency Pediatric Care (EPC) - 1:6
- EMS Vehicle Operator Safety (EVOS)
  - 1:20 for classroom day
  - 2:6 for driving skills
- First On The Scene – 1:6
- Geriatric Education for Emergency Medical Services (GEMS) 1:6

- EMS Safety 1:10
- Tactical Combat Casualty Care (TCCC) 1:6
- Tactical Emergency Casualty Care (TECC) 1:6 (includes TECC-LEO)

#### *Notes*

*\*a 1:6 instructor to student ratio (ISR) is required for courses that include clinical skills practice.*

*\*a 1:10 ISR is required for courses that include patient simulations without clinical skills practice, and/or course activities in which students participate in groups.*

*\*a 1:20 ISR is required for didactic courses with no skills practice, patient simulations, or course activities.*
